

2024 Annual Partnership Opportunities

Emerging Prairie energizes the entrepreneur, technology, and innovation ecosystems. We believe that as we weave these areas together and move them forward, we will be able to maximize the region’s potential and see catalytic community and economic development.

Working with Emerging Prairie

Rebecca Udem
Founder
Growing Small Towns

“Working with Emerging Prairie was an amazing experience! The work we’ve launched at Growing Small Towns is kind of different, maybe a little offbeat, and so I don’t always find myself presenting to an audience of so many open-minded and open-hearted people. From that one opportunity at StartupBREW, I’ve already written three different artists into a grant proposal for our organization and am actively working on three new partnerships with organizations that had team members in the audience that day. I am so grateful for the chance to tell our story and meet people who dream big like I do!”
